RE: Status of NEMIC Conditions of Certification as a Nonresidential Mechanical
Acceptance Test Technician Certification Provider

Dear Mr. Holt:

NEMIC was approved at the March 11, 2015, Business Meeting as a Mechanical
Acceptance Test Technician Certification Provider for technicians conducting
acceptance testing to demonstrate compliance with the 2013 Building Energy Efficiency
Standards for newly constructed buildings and alterations to existing buildings.

This approval included the following condition:

- By June 9, 2015, NEMIC must have implemented its website, as described in its application.
- NEMIC hereby agrees to the above Condition of Approval, and further agrees that its failure to comply with this Condition of Approval provides grounds for the Energy Commission to revoke all or part of this approval.

This letter is to inform you that NEMIC launched the described website on May 21, 2015. Energy Commission staff reviewed and approved the website. As of June 5, 2015, the Condition of Certification has been met.

Mr. Charles Holt
